"More education can help us only if it produces more wisdom..."

(E.F. Schumacher: small is beautiful)

**TO ALL** • Universities • Schools • Individuals  
• Development organizations • Environmental organizations • Churches  
• Social, political, economical organizations

## OFFER:

### Lectures / speeches (with discussion/ debate) about...

- ... family planning & AIDS- prevention (motivation; methods): Practical examples
- ... fair economy: How can self-reliance be enhanced
- ... how to tackle symptoms **without** ignoring the causes
- ... ecology (consumption ⇔ contentment/ frustration)
- ... non- violence (motivation; responsibility)

### Cooperation, Development, Promotion:

- Development policies
- Action plans (sustainable development)
- Coordination with other organizations
- Good example actions (ecology; AIDS- prevention etc.)

### Realization of projects:

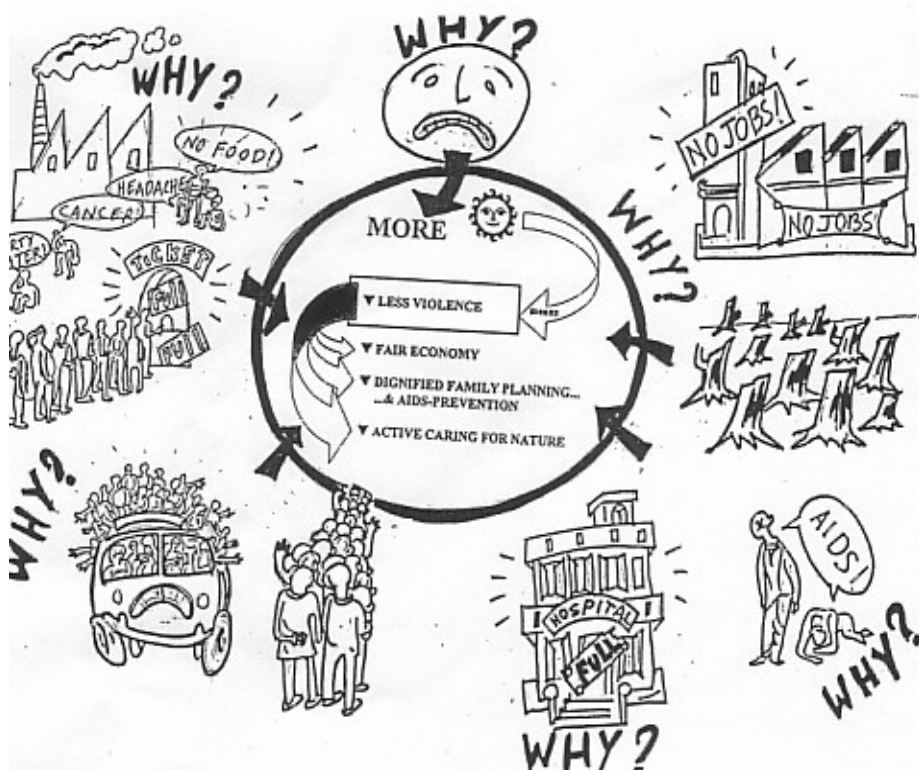

- **Practical seminars for the production of solar-systems:** • solar-ovens for families; • parabolic community kitchens for 100 people and more; • solar dryers for families or industries
- Practical integration of human rights like **reproductive health care; fair economy** etc.

### COST :

Honorarium: between 7.- and 2100.- [TALENT or \$] per day (social & ecological criteria)

**THANK YOU FOR CARING.**

Projects can only be **SUSTAINABLE** if

- FAIR ECONOMY  
*and*
- DIGNIFIED FAMILY PLANNING & AIDS-  
**PREVENTION**  
*and*
- ACTIVE CARING FOR NATURE

are integrated with *as little VIONENCE as possible.*

## DEFINITIONS:

- **Development; Civilization; Progress:**

= Improvement of the **quality** of life, in balance/ harmony **with nature**

≠ Unlimited materialistic growth on a limited planet

≠ Accepting “solutions”, which will cause the problems of future generations

- **Fair Economy:**

= Money/ material goods cannot be multiplied without personal work

& Resources like ground, water, air, oil etc. cannot be property of a few individuals

& People who *benefit* beings and nature should get a higher profit than people who *harm* beings and nature: they loose money and status

Today the **wallet** is one of the most important tools, which **must be used**, in order to promote a sound **balance between** (the amount of) **human beings and nature** (ecology):

- **Dignified Family planning & AIDS- prevention /Reproductive Health Care:**

= People have the **freedom to choose**, how many children they wish to have

⇒ Only if the access of (1)family planning methods and (2)neutral information is organized, unwanted pregnancies and sexually transmitted diseases (STDs) can be prevented!

= Family planning (F.P.) is a human right (since 1968)

⇒ F.P. /AIDS-prevention services must be available ...**BEFORE** the first sexual experience!

- **Active Caring for Nature (Ecology):**

= People try to **use/ consume as little as possible** of the harmful energies / resources

⇒ Promote • solar energy; • biogas (fuel and fertilizer); • wood if more grows than is consumed • water- and wind energy etc.

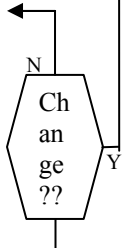

who wants to tackle problems with an EXPONENTIAL dimension?

## UNLIMITED GROWTH ON A LIMITED PLANET:

We can become aware what **exponential growth** (everything that grows in a [%/year]- way) means by knowing how to calculate the...

$$\text{...DOUBLING TIME [YEARS]} \approx \frac{70}{\text{GROWTH [\% / year]}}$$

The main reason why the economy **must** grow [%/year] is, **because...** the *interest system* [%/year] asks constantly for more and more. The **need** (≠demand) of the underprivileged people is not important for the economy of nowadays - as they cannot pay. *Interest* is paid by the 'little havers' subsidizing the 'big havers', killing the 'non havers'. The **growing gap** between 'poor' and 'rich' promotes violence from people to people, from people to nature. Materialistic growth [%/year] and population growth [%/year] **could be prevented, but...** the economy **must** grow [%/year] **because...**

To support this, means to support collective suicide for the grace of the biggest religion on earth, which is m ??? y!

|                       |    |    |    |    |    |    |    |     |     |
|-----------------------|----|----|----|----|----|----|----|-----|-----|
| GROWTH [% / year]     | 1  | 2  | 3  | 4  | 5  | 10 | 12 | 15  | 20  |
| DOUBLING TIME [YEARS] | 70 | 35 | 23 | 18 | 14 | 7  | 6  | 4.5 | 3.5 |
